

FAEMA PRESIDENT ESPRESSO MACHINE

- FAEPRESIDENTA4 • 4 Group
- FAEPRESIDENTA3 • 3 Group
- FAEPRESIDENTA2 • 2 Group

PRODUCT FEATURES

Smart Boiler (patented) - significantly increases the performance levels of hot water and steam, whilst optimising the water level in the boiler.

Cold frothed milk - A special refrigerated unit is equipped with a system that makes it possible to froth milk by using air alone thus keeping it cold

Perfect Grinding System (PGS) - allows obtaining a perfect grinding, always.

AutoSteam Milk 4 (optional) - a steam wand that, in addition to dispensing steam mixed with air like the traditional Auto Steam (patented), is characterised by a terminal that allows you to mount or heat even small amounts of milk (of approximately 50 cc). It allows 4 milk recipes.

Steam wand cold touch.

Lights on coffee groups.

New interface.

New brass portafilters.

Adjustable temperature.

Steel filter holder as standard.

Optional:

Inox & Desmopan portafilter

3 Push-Button interface

Back lights

Telescopic AutoSteam
