PRODUCT FEATURES

Smart boiler technology - significantly increases the performance levels of hot water and steam, whilst optimising the water level in the boiler and ensuring the thermal balance for an ever-perfect result in the cup even under conditions of maximum use.

Adjustable thermal system for constant quality drinks (*allows adjusting the temperature of each coffee group easily so to adapt it to any coffee blend*).

Vertical push-button panel with LED buttons.

Lights on each group for correct lighting of the work area.

Redesigned steam wands ensure better ergonomics.

Brass filter holders with soft touch handles.

- Optional:**
- Autosteam - steam wand equipped with a patented system that simultaneously delivers steam mixed with air to heat or froth the milk without manual intervention.
- Tall cup.
- Electric cup warmer.
- Mixed water.
- Stainless Steel portafilters.
