CODE: NEM-0038420250

KEY BENEFITS

- Prepares your gelato and, when ready, it **automatically stores** it in the machine, and keep it at the **right temperature** as long as needed.
- The software allows to **detect the density** of your gelato. When the preparation has reached a determined consistency, the software **automatically stops** the mixing motor and **switches to storage mode**.
- A **single touch** allows to start the production of gelato, ice cream, frozen yoghurt, sorbet, granita.

KEY FEATURES

- You can process up to 800/1000g of mixture in 25-35 min, using the fixed bowl or the handy removable bowl; both made of 18/10 stainless steel.
- The machine's operation is very flexible, it can be used in **fully automatic or manual mode**.
- Comes with a large 2 Lt. capacity AISI 304 stainless steel removable bowl.
