Stainless steel removable bowl:	2,5Lt
Rotation speed:	63RPM
Power:	280 W
Electrical connection	220-240V/ 1ph/50-60Hz

CODE: NEM-0036780250

KEY BENEFITS

- Prepares your gelato and, when ready, it will store your preparation at the **right temperature** as long as needed.
- The software allows to **detect the density** of your gelato. When the preparation has reached a determined consistency, the software **automatically stops** the mixing motor and **switches to storage mode**.
- A **single touch** allows to start the production of gelato, ice cream, frozen yoghurt, sorbet, granita.

KEY FEATURES

- You can process up to 1 kg (1 qt) of mixture in 20-30 minutes, using either the fixed bowl made of 18/10 stainless steel or the handy removable bowl in stainless steel with handle for easier removal.
- The **magnetic safety** device automatically stops the paddle when the lid is lifted.
- Electronic control. Software allows to **control the density** of your gelato. **Automatically stops** mixing motor as soon as mixture effort becomes excessive and **starts the storage function**.
- The blade is made of stainless steel with removable scrapers to ensure hygiene and strength.
- The machine body is entirely made of stainless steel.
- Comes with a large 2,5 Lt. capacity AISI 304 stainless steel removable bowl.
