Counter top Ambassade units are designed for intensive use; they are provided with high quality components, chosen for their durability and reliability, they are tested and proven. They are designed to be placed on supports.

Ambassade grills are characterized by the simplicity of their use and their robustness. The ribbed grills allow for a very homogeneous cooking with marking, and are specially efficient for cooking meat, steak or large fish. The planchas are recommended to cook fragile food that require cooking across the entire surface; hamburgers, eggs, fish fillets, vegetables.
