

FOOD-PROCESSOR: EMULSIFIER

SAM1050853

PRODUCT FEATURES

- Brushless motor technology - Maintain the torque throughout the speed range.
- Powerful & efficient motors.
- Lightweight, compact design.
- Exclusive force control system - Guarantees a uniform, high-quality result.
- Generate less noise - improving the workplace environment.
- Improved air / water-tightness, as no ventilation is required.
- Programmable functions & pulse button.
- Polycarbonate lid with "cut&mix" mixer.
- Reverse function - ideal to mix rather than cut.
- Robust construction of stainless steel and food-grade materials of the highest quality.
- Advanced control panel - intuitive & informative.
- Safety microswitches on the hopper and lid position.
- Appliance certified by NSF International

TECHNICAL SPECIFICATIONS

| Model      | LxDxH (mm)  | Weight (kg) | Speed (rpm) | Capacity (Litres) | Power (W) | Electrical Connection |
|------------|-------------|-------------|-------------|-------------------|-----------|-----------------------|
